QA3™

Ophthalmic Stretcher

Outstanding surgical access –
exceptional patient comfort

AneticAid®

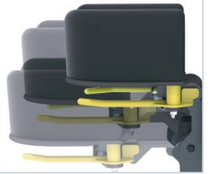

STANDARD FEATURES

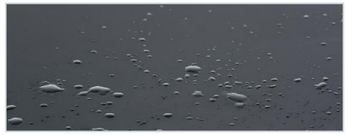

Spacious leg room, optimal positioning, optimal access from superior or temporal approach – the QA3 Ophthalmic Stretcher offers both the surgeon and the patient an improved surgical journey.

And for support workers it contributes to the drive in reducing manual handling with its exceptional low height, powered functions and lightweight manoeuvrability.

Dual-articulating headrest

This innovative, intuitive and easy to use head positioner is now fitted as standard, articulating not only on the head but the neck as well.
The positioner offers superb surgical positioning, surgical access and patient comfort.

Infection control

Smooth moulded surfaces and acrylic capped vac formings enclose trolley mechanics to minimise dirt traps. Anti-bacterial properties and innovative design for easy cleaning.

Exceptional surgical access

Providing 585mm of clearance underneath the head & back section for comfortable leg room and surgical access from both a superior and temporal approach.

With a low-profile depth sculpted backrest, sculpted shoulder area free from function operating handles and it's low-profile positioning headrest, exceptional surgical access and leg room are achieved.

Vertically operated safety side rails

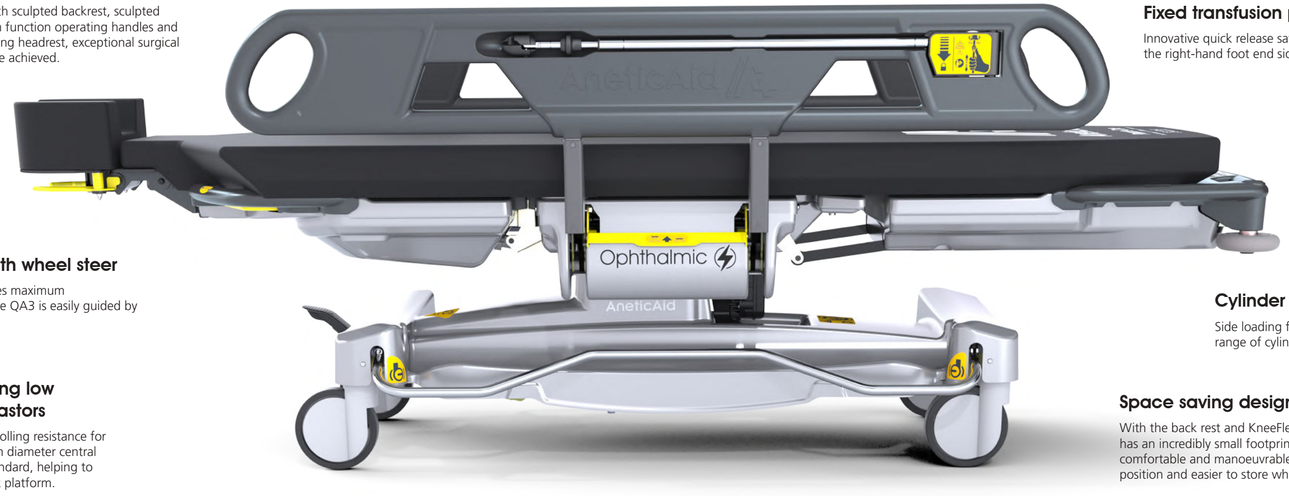

Store away under the mattress improving the ease of mounting and dismounting the stretcher for the patient.

Exceptional patient comfort

Low height of 495mm (excluding mattress) & store away side rails allow for easier mount/dismount, particularly for frail and elderly patients. Also including a versatile positioning headrest, wide patient platform and pressure care mattress for comfort.

Moving and handling

Zero transfers mean risk is minimised for patient and practitioner alike: from the ward, through anaesthetics, to the surgical procedures, and finally to first and second recovery.

Fixed transfusion pole

Innovative quick release safety locking mechanism, integrated into the right-hand foot end side rail for easy access and storage.

Press on / Press off 5th wheel steer

Our unique mechanism ensures maximum manoeuvrability and means the QA3 is easily guided by one support worker.

Simultaneous braking low rolling resistance castors

Polyurethane tyres offer low rolling resistance for high manoeuvrability: 150mm diameter central total lock castors fitted as standard, helping to offer a rigid and reliable work platform.

Cylinder trough

Side loading for ease of access, suitable for wide range of cylinder options including E, F, CD and HX.

Space saving design

With the back rest and KneeFlex raised, the stretcher has an incredibly small footprint - making it a comfortable and manoeuvrable recovery or transport position and easier to store when not in use.

QA3™
Ophthalmic Stretcher

Pressure care mattress

Manufactured from temperature-sensitive gel-feel foam that moulds to the patient's body shape, relieving pressure by distributing the load as evenly as possible. Outer material is anti-microbacterial, water resistant, vapour permeable and latex free. Now 5% resistant to chlorine and other disinfectant compounds.

AS STANDARD

SPECIFICATIONS Code: 21118

Minimum height	*495mm	Mattress length	2245mm
Maximum height	*875mm	Mattress width	700mm
*excludes mattress		Mattress depth	90mm
Surgical Access	585mm	Maximum patient weight	320kg
Minimum length	1700mm	Backrest	0 to +70°
Maximum length	2275mm	KneeFlex	0 to +30°
Overall width	805mm	Trendelenburg	0 to -12°
Castor diameter	150mm	Reverse Trendelenburg	0 to -10°
Weight	135.5kg	Headrest	0 to -87 / +45°

A unique combination of manoeuvrability and stability

POWERED FEATURES

Minimise risks for practitioners dealing with increasing patient weights with powered positioning: the whole stretcher platform or the backrest can be raised or lowered electronically from the panel at the foot end.

With six powered functions – platform raise and lower, back rest, KneeFlex, Profile, Trendelenburg and Reverse Trendelenburg - as well as CPR return – the QA3™ Ophthalmic Stretcher is a truly powerful and versatile platform for transport, treatment and recovery.

Battery powered

Long-life rechargeable lithium-ion battery (NMC) with highly accurate charge indicator

Electrically Powered Functions

Easy to operate using the hand control positive feel push button controls.

Platform height

Offers smooth movement to position the stretcher at any point in its height range – 495mm to 875mm

QA3™ Ophthalmic Stretcher

Backrest

Positions the backrest anywhere between the vertical and horizontal for maximum patient comfort

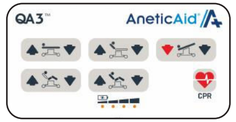

KneeFlex

Easy elevation of the knees to offer improved comfort in a supine position

Foot-end Control

Even greater flexibility when repositioning the QA3™ using the foot-end panel

Profiling

Easy elevation of the back rest and knees at the same time to offer improved comfort during recovery

CPR Return

If a patient needs CPR treatment, there is no time to lose: the powered CPR feature returns the stretcher swiftly to a horizontal, optimal height position for CPR treatment

Trendelenburg / Reverse Trendelenburg

Extremely smooth and controlled by a powered actuator, even at lowest height

ACCESSORISE YOUR QA3 OPHTHALMIC STRETCHER

Customise your QA3 Ophthalmic Stretcher at the time of ordering to better suit your department needs or add greater versatility to your QA3 with this range of convenient accessories.

Oxygen Delivery Bar & Drape Screen

Two products in one. An over patient drape / anaesthetic screen and oxygen delivery system. This versatile flexible accessory mounts onto the side rail via a clamp and can be bent over the patient for drapes to create a screen. The barbed end allows for oxygen tubing to be connected and the fenestrated end delivers a quiet, consistent, flow of oxygen within the screened area.

Description	Code
Oxygen Delivery Bar & Drape Screen	21365
Clamp - Universal (Socket & Rail) - Handwheel	10250

Push/Pull Bar

This foot-end mounted removable accessory helps to cater for those scenarios where additional manoeuvring requirements arise.

Description	Code
Push/Pull Bar	21390

Theatre Pillow

Tired of the number of pillows heading to the laundry reducing their availability? This superbly comfortable theatre pillow is covered in a water-impermeable material and reduces the turnaround time for pillows between uses. Simply clean & disinfect by hand between uses.

Description	Code
Theatre Pillow	10545

QA3 Accessory Bracket

A new side rail accessory bracket which can be fitted to our QA3™ Stretchers, allowing for other QA3 accessories to be fitted with ease.

Description	Code
QA3 Accessory Bracket	21156

Build options must be specified at the time of ordering

QA3™ OPHTHALMIC STRETCHER

Impressive head-end surgical access, low height, patient comfort and light weight manoeuvrability all combine to produce a perfect transport, treatment and recovery stretcher for ophthalmology.
