QA3™

Patient Stretcher

The complete solution for **patient transport**

AneticAid®

QA3 PATIENT STRETCHER SYSTEM

QA3 DRIVE™ Patient Stretcher

Our flagship stretcher - with inbuilt motorised drive.

Reduce your manual handling liabilities further with the compact, light weight and supremely manoeuvrable QA3™ DRIVE - the complete solution for patient transport.

Ideal for patient transport, examination and intubation in theatre and clinical areas, the QA3™ DRIVE is robust and has maximum patient comfort built in. The stretcher comes with exceptional low height capabilities and new pressure care mattress - now 5% more resistant to chlorine and other disinfectants.

Featuring inbuilt motorised drive, operated by innovative touch-sensitive pushing handles, the QA3™ Drive can be effortlessly controlled and travel up to gradients of 6°.

Featuring:

- **Inbuilt motorised drive**
- **Innovative drive handles**
- **5th wheel steering**
- **Long-life battery**

DESIGN & INNOVATION

Combining industry knowledge with innovative technology

MADE IN THE UK

Designed and produced at our UK manufacturing facility using the latest engineering techniques

GLOBAL DISTRIBUTION

Manufacturer, designer and supplier of high quality medical equipment around the world

10 WARRANTY YEARS

Subject to annual servicing

Unique manufacturer-backed Lifetime Warranty Scheme

STANDARD FEATURES

Supremely manoeuvrable, compact, lightweight and robust with maximum patient comfort built in. The QA3 Patient Stretcher is ideal for patient transport, examination and intubation in theatre and any other clinical area.

With the backrest raised, it is little more than 1.8m long, descends lower and is narrow and shorter than nearly all other patient stretchers on the market.

Gas assisted backlift

Unique design, precision controlled, easy lift system for enhanced user and patient comfort.

Exceptional patient comfort

Low height of 475mm (excluding mattress) & store away side rails allow for easier mount/dismount, particularly for frail and elderly patients. Also including a versatile positioning headrest, wide patient platform and pressure care mattress for comfort.

Trendelenburg tilt

Extremely smooth and controlled mechanism, even at lowest height.

Pushing handles

Four ergonomically positioned pushing handles for supreme manoeuvrability

5th wheel steering

Our unique mechanism ensures maximum manoeuvrability and means the QA3 is easily guided by one support worker.

Simultaneous braking low rolling resistance castors

Polyurethane tyres offer low rolling resistance for high manoeuvrability: 150mm diameter central total lock castors fitted as standard, helping to offer a rigid and reliable work platform.

Vertically operated safety side rails

Store away under the mattress improving the ease of mounting and dismounting the stretcher for the patient.

Infection control

Smooth moulded surfaces and acrylic capped vac formings enclose trolley mechanics to minimise dirt traps. Anti-bacterial properties and innovative design for easy cleaning.

Moving and handling

Zero transfers mean risk is minimised for patient and practitioner alike: from the ward, through anaesthetics, to the surgical procedures, and finally to first and second recovery.

Fixed transfusion pole

Innovative quick release safety locking mechanism, integrated into the right-hand foot end side rail for easy access and storage.

Cylinder trough

Side loading for ease of access, suitable for wide range of cylinder options including F, E or CD

Hydraulic lift mechanism

Exceptional low height capability, adjusted by independently operating pedals on both sides of stretcher

QA3™
Patient Stretcher

Pressure care mattress

Manufactured from temperature-sensitive gel-feel foam that moulds to the patient's body shape, relieving pressure by distributing the load as evenly as possible. Outer material is anti-microbacterial, water resistant, vapour permeable and latex free. Now 5% resistant to chlorine and other disinfectant compounds.

AS STANDARD

SPECIFICATIONS Code: 21110/21112

Minimum height	*475mm	Mattress length	2025mm
Maximum height	*775mm	Mattress width	700mm
*excludes mattress		Mattress depth	90mm
Minimum length	1700mm	Weight	128kg
Maximum length	2150mm	Backrest	0 to +90°
Overall width	805mm	Trendelenburg	0 to -12°
Castor diameter	150mm	Reverse Trendelenburg	*0 to -10°
Maximum patient weight			320kg

*NOTE - Reverse Trendelenburg enabled through a build option

Robust with maximum patient comfort built in

DESIGN & INNOVATION · MADE IN THE UK · GLOBAL DISTRIBUTION

DRIVE™ ASSIST FEATURE

Inbuilt motorised drive offers effortless movement, combined with ultimate control.

Because people and therefore patients are getting larger, it's crucial that we take moving and handling issues into account. We want to give practitioners a stretcher on which patients can be moved and positioned as easily as possible.

The introduction of our touch-activated, motorised DRIVE feature offers a major enhancement in a stretcher that already has ease of use, practicality and patient comfort built in. The QA3™ DRIVE can also be used in traditional fifth wheel steer mode.

Effortless travel

The QA3™ DRIVE Patient Stretcher can travel up to gradients of 6°.

Inbuilt motorised drive

No need to push or pull the stretcher: our inbuilt motorised DRIVE feature linked to the stretcher's fifth wheel offers superb manoeuvrability and control

Long-life battery

Capable of **20 kilometers on a single charge,** the DRIVE feature is powered by an advanced nickel metal hydride rechargeable battery.

Accurate battery readings

Highly accurate battery charge indicator is combined with a rapid charge function.

How does DRIVE™ ASSIST work?

QA3 DRIVE
Patient Stretcher

Here's the breakdown...

Firstly, how does DRIVE assist work functionally? Designed into the backrest frame of QA3 DRIVE are strain gauges that are connected to push handles.

As you push and pull the QA3 DRIVE, you flex the strain gauge frame imperceptibly, and this force is translated through its software into a torque requirement for the DRIVE assist wheel.

The greater the force needed, the greater the DRIVE assist delivered and done so in a natural, intuitive manner. You walk and a QA3 DRIVE will move at your pace — supreme control, supreme confidence.

How does it benefit you?

Secondly, how does DRIVE assist work practically?

According to health and safety executive guidelines, when operating a stretcher or patient trolley, the pushing or pulling force **should not equal or exceed 20 kilos to start a load in motion**. The pushing or pulling force should also not equal or exceed 10 kilos to keep a load in motion.

Cornering with a load exerts greater lateral forces on the body, affecting the shoulders, hips and lower back.

Which is why Anetic Aid have introduced the innovative and intuitive QA3 DRIVE Stretchers - to vastly reduce the start/stop and lateral forces whilst manoeuvring a patient transport stretcher.

DESIGN & INNOVATION

MADE IN THE UK

GLOBAL DISTRIBUTION

Motorised drive: effortless travel, ultimate control

POWERED FEATURES

Minimise risks for practitioners dealing with increasing patient weights with powered positioning: the whole stretcher platform or the backrest can be raised or lowered electronically from the panel at the foot end.

With six powered functions – platform raise and lower, back rest, KneeFlex, Profile, Trendelenburg and Reverse Trendelenburg - as well as CPR return – the QA3™ Treatment Stretcher is a truly powerful and versatile platform for transport, treatment and recovery.

Battery powered

Long-life rechargeable lithium-ion battery (NMC) with highly accurate charge indicator

Electrically Powered Functions

Easy to operate using the hand control positive feel push button controls.

SPECIFICATIONS			Code: 21116
Minimum height	*495mm	Mattress length	2025mm
Maximum height	*875mm	Mattress width	700mm
*excludes mattress		Mattress depth	90mm
Minimum length	1700mm	Maximum patient weight	320kg
Maximum length	2150mm	Backrest	0 to +70°

Weight	134kg	Reverse Trendelenburg	0 to -10°

QA3 Treatment Stretcher

Platform height

Offers smooth movement to position the stretcher at any point in its height range – 495mm to 875mm

Backrest

Positions the backrest anywhere between the vertical and horizontal for maximum patient comfort

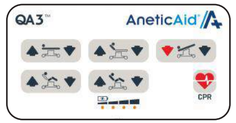

KneeFlex

Easy elevation of the knees to offer improved comfort in a supine position

Foot-end Control

Even greater flexibility when repositioning the QA3™ using the foot-end panel

Profiling

Easy elevation of the back rest and knees at the same time to offer improved comfort during recovery

CPR Return

If a patient needs CPR treatment, there is no time to lose: the powered CPR feature returns the stretcher swiftly to a horizontal, optimal height position for CPR treatment

CPR

Trendelenburg / Reverse Trendelenburg

Extremely smooth and controlled by a powered actuator, even at lowest height

QA3™ Treatment Stretcher

Effortless positioning at the touch of a button

BUILD OPTIONS

Customise your QA3 Patient Stretcher at the time of ordering to better suit your department needs or add greater versatility to your QA3 with this range of build options.

Reverse Trendelenburg

Enable 12 degrees of Reverse Trendelenburg to your QA3 Stretchers with this handy build option. Extremely smooth and controlled mechanism allows this to be achieved even when the stretcher is at its lowest height.

Patient's Possession Storage Container

In need of more storage space on your QA3™? Add a conveniently positioned, foot-end base mounted storage container, mounted onto retractable runners for when the container isn't needed.

Department ID Labelling

Struggling to identify a QA3™ as belonging to your department? Add your department name to your QA3 to aid equipment identification.

PLEASE NOTE: A MAXIMUM OF 22 CHARACTERS INCLUDING SPACES ARE ALLOWED.

BUILD OPTIONS

Additional Transfusion Pole - Right Hand Side Rail Mounted

Add a second fixed transfusion / infusion stand to the right hand side rail on your QA3™ Patient Stretcher. Popular with Endoscopy departments.

Oxygen Cylinder Bracket - For CD Sized Cylinder

Add a compact and conveniently positioned bracket, retaining the position of CD sized Oxygen Cylinder brackets within the base mounted cylinder trough.

Bracketing for Emergency Suction Systems

Did you know? We can offer a compact and conveniently positioned bracket for your emergency / SOS suction system to be mounted on your QA3 Stretcher.

This build option allows your QA3 Stretcher to be suitable for a wide range of suction devices - perfect for critical procedures that require a patient's airways to be clear.

***NOTE: Oxygen & Suction Apparatus not sold by Anetic Aid.**
