QA4™
Mobile Surgery System

Surgical versatility guide

Innovative **Medical** Technology - **Practically Applied**

AneticAid

Innovative **Medical** Technology - **Practically Applied**

Anetic Aid is a world-leading designer and UK-based manufacturer of medical devices, used extensively for patient transport, treatment and recovery.

Our mission

To deliver best outcomes for patients and best experiences for clinical teams: we listen carefully and understand needs.

This allows us to design, develop and manufacture – and to establish partnerships – that lead to the supply of innovative, intuitive, high-quality medical devices for patient transport, treatment and recovery.

The highly versatile QA4 Mobile Surgery System evidences this approach, and the following pages detail the attachments and accessories which can be used to customise it for all main surgical specialisms.

They range from simple arm and hand tables to sophisticated dual-articulating headrests, and from lithotomy stirrups to orthopaedic fixation systems (for procedures such as total hip replacement).

This guide covers the options for ordering accessories as part of a QA4 build specification and availability to purchase separately as stand-alone items.

Contents

BREAST Supine / Fowler	3
ENT (ear, nose and throat) Supine	4-5
GENERAL Supine / Prone / Trendelenburg / Reverse Trendelenburg	6-7
GYNAECOLOGY Supine / Trendelenburg	8-9
HEAD AND NECK / OMFS Supine	10-11
